It is my strong recommendation that I or somebody that I recommend have the opportunity to perform a complete prep of the camera rental equipment at the rental house. If a complete and adequate prep is not carried out, I will not assume any responsibility for failure of equipment to operate and perform correctly. If equipment is ordered by the production company without a prep being performed, and does not arrive on set in working order, or if batteries are not adequately charged for camera operation, and pieces of equipment are missing or lack compatibility I will not be held responsible.
